(54) HEAD OF GOLF CLUB AND MANUFACTURE THEREOF

(57)Abstract:

PURPOSE: To provide a metal wood of a golf club which can easily control the flying direction of a golf ball.

CONSTITUTION: At least a face part 1 is formed from a plate shaped member which is made through the forging and rolling by using the NiTi alloy material having ultraelasticity, and the part 2 other than the face part 1 is formed through casting, and a head is formed integrally through the welding in which NiTi alloy is used as welding material.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
